Sacramento, CA 95814

Dear Don:

AAARG!!!!

As you know, the East Bay Municipal Utility District plans to deliver water through Sacramento County. There are now several routes under consideration as a way to deliver this water to its desired destination. Apparently, alternative routes are being considered due to contractual problems between EBMUD and the U S Bureau of Reclamation. How can they even consider building miles and miles of NEW pipeline that runs parallel to the (unused) Folsom South Canal. The construction and maintenance of those (unnecessary) miles of new pipeline will have a serious environmental impact on the community and waste pocketfuls of tax money. Don, can you encourage the County to assist in negotiating a contract resolution so that the Folsom South Canal can be utilized.

Of a personal concern, proposed alternative route 4 of this Supplemental Water Supply Project (see map attached) cuts our family farm in half.

When you have some time I would love to hear from you on this. Hope all is well with you. Take care.

Sincerely,

*Carol*
